

WARRANTY INFORMATION

• Your warranty is contained below. Please be sure to read the warranty in its entirety and return the Warranty Registration Form located on the last page of this Manual. • Like any mechanical device, a bicycle and its components are subject to wear and stress. Different materials and mechanisms wear or fatigue from stress at different rates and have different life cycles. If a component life cycle is exceeded, the component can suddenly and catastrophically fail, causing serious injury or death to the rider. Scratched, cracks, fraying and discoloration are signs of stress-caused fatigue and indicate that a part is at the end of its useful life and needs to be replaced. While the materials and workmanship of your bicycle or of individual components may be covered by a warranty for a specific period of time by the manufacturer, this is no guarantee that the product will last the term of the warranty. Product life is often related to the kind of riding you do and to the treatment to which you submit the bicycle and the standard of maintenance and care you have for your bike. The bicycle's warranty is not meant to suggest that the bicycle cannot be broken or will last forever. It only means that the bicycle is covered subject to the terms of the warranty.
